

# Multiples

1. What number is always a multiple?
2. What numbers are both multiples of 2 and multiples of 3?
3. What number (besides 0) is a multiple of both 5 and 7?
4. Multiples that appear a lot are called "common" multiple. Which multiples are very common?
5. Which numbers are never multiples? (In other words, which numbers are only colored red?)
